PERSONAL PROFILE

I am a dedicated and efficient Software Engineer with over 5 years of experience, specializing in building Scalable and reliable data intensive applications.

EDUCATION

National Open University – Bachelor's Degree in Computer Science.

MIVA Open University – Bachelor's Degree in Software Engineering.

WORK EXPERIENCE

Shopascart – Full Stack Software Engineer (2023 - Present)

- Design, develop, maintain, and improve software.
- Write clean and efficient code.
- Assisting in enhancing existing software components and adding new features, including bug fixes
- Integrate external software libraries and APIs into existing projects.
- Create and maintain database designs for data storage and processing.
- Implementing new features based on business requirements.
- Writing technical documentation

GOMYCODE – Instructor (2023 - Present)

- Conducted practical coding workshops and exercises to reinforce students' understanding of web development concepts and React.js.
- Provided one-on-one assistance to students, addressing their specific learning needs and challenges in web development and React.js.
- Reviewed and provided constructive feedback on students' coding projects, helping them improve their coding skills and best practices.
- Guided students through the development of real-world projects, helping them apply their knowledge of web development and React.js to create practical applications.
- Encouraged collaboration among students, fostering a sense of teamwork and shared learning experiences within the class.
- Helped students develop problem-solving skills and a systematic approach to tackling coding challenges.
- Shared insights into the latest industry trends and best practices in web development and React.js, preparing students for the job market.
- Taught students how to write efficient and optimized code, emphasizing the importance of clean, maintainable, and scalable code.

Omniteleos – Tech Lead (2022 - Present)

- Developed and implemented responsive front-end interfaces using HTML, CSS, and JavaScript, ensuring optimal user experience across different devices.
- Built RESTful APIs using Node.js and Express.js, enabling seamless communication between front-end and back-end systems.
- Implemented efficient database designs using MySQL, PostgreSQL, and MongoDB, optimizing data storage and retrieval.
- Actively participated in code reviews, providing valuable feedback and improving code quality.

Portfolio: <https://techmornach.vercel.app>

- Actively participated in tech conferences and meetups, staying updated with the latest web development trends and sharing knowledge with the developer community.
 - Utilized Git and GitHub for version control, enabling effective collaboration and code management within the development team.
-

Accenture– Data Analyst Intern

- Use of Microsoft Excel for performing extensive data analysis.
 - Formatted and Cleaned Data sets to get the required data.
 - Presented results of analysis in a well-structured form using PowerPoint.
 - Use of R programming language for data analysis.
-

Upwork – Software Engineer(Freelancer) (2021 - Present)

- Developed customized websites and web applications for diverse clients, meeting their specific requirements and delivering high-quality solutions.
- Collaborated closely with clients to understand their needs and provide technical guidance throughout the development process.
- Implemented responsive designs and optimized user interfaces for mobile devices, enhancing the overall user experience.
- Integrated various third-party APIs and services to extend application functionality and improve user interactions.

Portfolio: <https://techmornach.vercel.app>

- Built Expert Advisors for the MT5 platform bringing a 20% daily profit for client.
- Used C# to developed Unity Games of different Genre for Clients.

Luvable Superstores – Full Stack Engineer (2020 - 2022)

- Designed and developed the company's website using HTML, CSS, and JavaScript, ensuring a visually appealing and user-friendly interface.
- Collaborated with programmers and graphic designers to create a website that aligned with the company's branding and visual design intent.
- Gathered and refined requirements from CEO's to develop website content and functionality, ensuring a seamless user experience.
- Implemented a version control system using Git, enabling efficient code collaboration and management within the development team.
- Conducted regular website maintenance, ensuring smooth operation and troubleshooting any issues that arose.
- Developed an e-commerce site, integrating secure payment gateways and inventory management systems, resulting in increased online sales

Salvador Tech – Mobile Engineer (2018 - 2019)

- Debugged Software and Hardware issues in mobile devices.
 - Worked with fixing issues with motherboards and integrated circuit.
 - Educated Customers on proper device handling.
 - Explained technical terminologies in an easy and simple way for non-technical customers to understand.
-

SKILLS

- Strong knowledge of algorithms and data structures.
- Proficiency in JavaScript and PHP, with knowledge of HTML, CSS, and other programming languages.
- Experience with JavaScript libraries and frameworks such as React and Angular.
- Experience with back-end technologies and frameworks like Node, Express and Socket.io.
- Experience in developing RESTful APIs using Node.js and Express.js.
- Expertise in database management systems including MySQL, PostgreSQL, and MongoDB.
- Familiarity in building smart contracts for Web3 using Solidity.
- Proficiency in use of Microsoft Excel for detailed Data Analysis.
- Version control using Git and familiarity with GitHub workflows.
- Experience with web hosting platforms.
- Proficiency in use of C# for Unity Game development.
- Expertise in developing indicators and expert advisors for the MT5 platform.
- Experienced in 3d and 2d design using Adobe Photoshop and blender.
- Experienced in VFX and video editing using Adobe After Effects
- Strong analytical, reasoning, organizational, and problem-solving skills.
